## FLAMINGO

### KEY CHARACTERISTICS

Flamingo Improved is a widely adapted Asian-style bunching spinach. Typical of the type it has mostly pointed leaves and long strong stems with a spot of pink at soil level. In addition to Asian markets, it is a great choice for bunching. Flamingo is good for cool weather in spring and fall. "Improved" in the name refers to a broader range of Mildew resistance.

**Pucker/Savoy**

Flat

**DISEASE RESISTANCES (HR=High Resistance, IR = Intermediate Resistance)**

**Downy Mildew Resistant: 1-14, 16**
