NEW FOR 2025!

PowerCore®Enlist®Refuge Advanced

New, high performance PowerCore®Enlist®hybrid with outstanding grain yields over a broad geography. A taller, more robust plant style that can also crank out a lot of tons of high quality silage to support high milk production. The semi-flex ear works across a wide range of plant populations with husks that open up to speed drydown of grain with more moderate test weight. This one fights off Northern Corn Leaf Blight plus Tar Spot and can be pushed for the best performance on the moderate to high-yield acre in zone and north. Offers the flexibility of using glyphosate, glufosinate, 2,4-D choline and FOPS herbicides plus provides above-ground insect protection.
