NEW FOR 2025!

New introduction to the Seedway organic line that is strong on defense with consistent performance on offense for both grain and silage. A good-sized plant in the field sports a wider leaf plus starch and fiber numbers that support good milk production. The ear is longer with good girth that flexes at lower plant densities and produces high quality grain protected by very good husks. A leafier plant helps shade the soil to deter weed growth later in the season. Healthy stalks and staygreen plus a very desirable complement of ratings for Gray Leaf, Northern Leaf Blight, and Tar Spot. Seed comes untreated.
